Correlations are printed only if all 9 standard items have at least 10 responses each.

Correlation coefficients range from -1.0 to 1.0, and indicate the direction and strength of the relationship between two items.

Occasionally some (but not all) correlations will be missing. This can happen if all students give the same rating on a particular item.

Median is the middle score when all ratings are rank-ordered. SD (standard deviation) is the DISagreement among raters. Difference from the group avg. for Dept, Col/Div, and Campus ranges from --- to +++. 0 = negligible difference. Percentile = percentile of your average rating within a particular group: campus, college/division, department. \*\* Percentiles not reported for groups with under 10 sections. A confidence band indicates an interval within which we are 95% confident that the 'true' value of the average lies. See [www.colorado.edu/fcq](http://www.colorado.edu/fcq) for details on all statistics, and for results from the last 7 years. Blank (BL) and non-applicable (NA) responses are tallied but excluded from averages.
